

Sustainability Policy

10000-GEN-POL-005

Revision B

Oil Gas Power International (OGP) is committed to continuous improvement:

With a focus on energy, OGP will reduce the amount of energy used in our company offices over the next 3 years working with our equipment providers, staff and partners.

With a focus on energy, OGP will reduce the amount of energy used at our company offices over the next 3 years working with our equipment providers and partners. We are committed to reducing company office energy use to under 20,000 kWh per year by 2019.

As of 1st Jan 2016, all future purchases of equipment must be rated through the Energy Star Program or EPEAT. OGP staff will monitor and track energy use the office using the Energy Star program

During out-of-office hours, staff will place all devices and equipment into energy saving mode when not in use.

OGP is committed to establishing, promoting, maintaining and improving a culture of sustainability and environmental responsibility by staff, our supply chain, and broader stakeholders

OGP is committed to providing timely management review of sustainable business operating procedures and practices. We commit to track, measurement and report on our performance of the implementation of sustainability practices with a commitment of continual improvement in these areas.

As part of our larger commitment to sustainability in the operational and procedural practices of OGP, we are also committed to providing the best, most sustainable services possible for our clients for our projects. We look to be a partner in providing sustainable solutions during the planning, implementation, review and reporting phases of projects.

The practices and operations of OGP are consistent with the principle goals and strategies as set out by the UN Global Compact. We also ensure that our practices and procedures are in compliance with all environmental, health and safety ordinances in the cities and regions in which we provide our services.

OGP is a provider of a wide range of services, technologies and products to the infrastructure and engineering industries. Our activities include design, supply, manufacturing, installation, commissioning and maintenance.
